

Guidelines for implementation of JUB Corona hygiene measures in teaching operations

January Examination Period and Spring term 2022

- All teaching rooms have been measured and reorganized to ensure social distancing. At the entrance to all teaching rooms the maximum number of allowed seats is indicated and Instructors of Record are responsible that the maximum number of people in the room is not exceeded.
- Disinfectant dispensers are available in the entrance area of every building on campus. Students and Instructors of Record are asked to use them when entering the rooms.
- All teaching rooms are cleaned on a daily basis and have available disinfection spray, paper towels and disposable gloves for Instructors of Record. Common teaching equipment should be spray disinfected after personal use.
- Participants (staff and students) must be fully vaccinated, recovered, or tested to access classrooms and/or participate in in-presence teaching. They must be prepared to prove a full vaccination, recovery from a Covid-19 infection or a current test with negative results upon request. Test center certificates have a validity on campus of 24 hours, PCR test certificates for 48 hours, self-tests are not accepted as proof.
- When entering and leaving classrooms, everyone must wear a mask (FFP2 or KN95/N95 standard). Students are responsible to have their own mask. Depending on whether regional regulations allow for it Instructors and speakers may take off their masks when the required distance to the remaining audience is conserved. Whether masks may be taken off when students and teachers have taken their places depends on the risk situation and will be re-evaluated on a regular basis.
- For in-presence teaching, all participants must register using the Luca App on arrival in the room and when leaving.
- Rooms should be aired regularly. Instructors of Record must finish their classes in time and open windows for fresh air circulation, and ensure that all students have left the room no later than 5 minutes after the end of the class. When ventilating the room, the heating should be switched off (if applicable and technically possible). In case the same room is used again directly after the break, students are not allowed to enter the room earlier than 5 minutes before the scheduled start of the class. Waiting times and breaks should be spent outside the buildings.
- Wherever possible everyone is expected to keep a sufficient distance from others.
- Special regulations may apply in labs and practical courses. These will be announced by the IoRs.

Testing Details

We adhere to the German “3G rule” (*geimpft, genesen, getestet*) to ensure that in-person classes are carried out safely. Participants (staff and students) must be able to provide evidence of either a full vaccination status, a recovery from a Covid-19 infection or a negative Covid-19 test confirmation.

- A full vaccination means that 14 days must have passed since the 2nd dose was given (or as indicated in the vaccination documents for a given vaccine). Booster vaccinations are effective immediately after they have been administered.
- Proof of vaccination can be provided via the vaccination passport, a medical certificate of vaccination or digitally (e.g., via the Corona-Warn-App or CovidPass-App).
- Recovered persons require proof of a positive PCR test from at least 28 days and a maximum of 90 days ago.
- Negative antigen corona tests must be obtained from an official test center.
- Checks are carried out randomly by the Security Service. IoRs have the right to additionally carry out controls themselves or to have them carried out by TAs.
- Admission to classes without valid proof can be refused. Failure to comply with the regulations can lead to the exclusion from modules.
