JACOBS CAREER FAIR
Explore your professional future

MARCH 04, 2020
JACOBS UNIVERSITY

14:00–18:00
JACOBS UNIVERSITY, CAMPUS CENTER
WWW.JACOBS CAREERFAIR.DE

PROGRAM & EXHIBITOR CATALOGUE
Dear students, dear exhibitors,

Like most things in today’s world, the labor market is ever evolving. Rapid technological changes, globalization as well as digitization have had a profound effect on how employers and candidates connect. In many ways, it has made the initial contact easier – in others, it has created an enormous cloud of choices, which makes looking for the best job or the most qualified applicant feel like searching for the proverbial needle in the haystack.

Jacobs Career Fair is a place where employers and specialized talent meet in person. Organizations, from a wide variety of size, sector, and work area, have the chance to talk to our highly educated, aspiring and internationally oriented students. Living and learning on a diverse campus of more than 120 nationalities has shaped them into forward-thinking young individuals, equipped with sound expertise in their respective fields, paired with leadership and intercultural skills. On the other side, our exhibitors, global companies, start-ups, regional companies, non-profit organizations, and research institutions alike, inform, discuss and promote the job opportunities they offer. The Jacobs Career Fair is a place where supply and demand meet and, ideally, lead to a flourishing exchange.

Now in its sixth year, the Jacobs Career Fair offers, besides the fair, a variety of workshops and career talks. Experienced human resources professionals and experts, among them numerous alumni of Jacobs University, provide first-hand insights and answer questions about application strategies, entrepreneurship, and labor market needs.

Our Career Fair is a land of opportunities — for students, alumni, and employers alike. I am confident that you will find what you are looking for and wish you all inspiring and successful talks.

Best regards,

Prof. Dr. Antonio Loprieno

President of Jacobs University
Dear students,

In today’s rapidly growing and evolving job market, universities have the challenging task of preparing students for the exciting, yet unpredictable future. Our alma mater provides you with a myriad of opportunities to explore your professional future (the tools or hardware, so to say). Be it company recruiting events or the largest event on campus, today’s Jacobs Career Fair, everyone can benefit from taking part in such events and understanding what is out there.

Beyond this, the Jacobs Alumni Association can offer you a network that can prove helpful at any point in life and in multiple facets. Many alumni are back on campus today, and I can assure you, that every one of them is looking forward to meeting you and making you a part of their network. Speak to them, interact with them, share your career aspirations with them. They have been where you are and can help you get to where you want to go.

Our global alumni community is fueled by our passion to help each other grow, and even more so, by the opportunity to help the younger generations of Jacobians. For alumni, coming back to campus for the Career Fair is an opportunity to see this passion in action and a chance to share the knowledge they have acquired after leaving Jacobs. With varied expertise and diverse backgrounds, alumni will be able to provide you with scores of insights into today’s labor market and show you how to leverage the experience and knowledge you gain at Jacobs to your advantage.

We wish you luck with your first steps into the job market and a very successful Jacobs Career Fair!

Stefan Rustler
Alumni Association President
Class of 2012
Highly dynamic changes in market and competitive conditions pose major challenges for the economy. More than ever, companies are forced to act agile. Knowledge and innovation must be placed at the center of strategic corporate decisions in order to maintain and expand competitiveness in the future.

In their innovation efforts, companies can draw on an excellent, growing network of science and research facilities here in Bremen. Above all, they benefit from the large pool of well-educated graduates of the universities in the state of Bremen. Since innovation processes focus on people who dare to do something new with courage, creativity and initiative, the transfer of ideas from person to person and an effective transition from the universities into the economy is a key success factor for companies.

Jacobs University Bremen provides us with a pool of qualified employees for the economy. With their “Jacobs Career Fair” event, companies from Bremen will have an excellent platform to gather international talents. Companies from various different industries have the opportunity to meet these well-qualified and motivated young academics. Students have the occasion to talk to their potential employers and can find out about the entry and career opportunities that are important for their personal growth. The “Jacobs Career Fair” is a great opportunity for these young academics and corporate representatives: they can get in touch with each other to exchange about their future perspectives. In light of this, I hope that all the participants of this event have interesting discussions and that they establish new, valuable relationships.

Janina Marahrens-Hashagen
President of the Bremen Chamber of Commerce – IHK for Bremen and Bremerhaven
Studying at Jacobs University gives personal contacts and professional connections, often for the whole life. The Jacobs University Alumni Association was founded by the first graduating class in 2004 with the aim to foster relationships between students after graduation, to create and nurture a lifelong bond between the university and its graduates, as well as to support current and future generations of students.

All members of the Alumni Association have the opportunity to share contacts, stories and expertise with other individuals who consider Jacobs University a lifelong home. An online account for keeping in touch with all graduates and classmates, yearly Homecoming and Class Reunions on campus, a growing number of local chapters in more and more cities around Europe and worldwide, and many other opportunities to get involved and to benefit from exclusive services: all this gives rise to the broad, multicultural, international networking community of Jacobs University Alumni.

CAREER TALK

Ina Huppertz
Postdoc Fellow
The European Molecular Biology Laboratory
BSc Biochemistry and Cell Biology, 2012

“The transdisciplinary and multicultural environment at Jacobs has inspired me to take up a career in the academic sciences and contribute to the understanding of fundamental processes underlying our life. Science needs intelligent and hard-working people, who can think outside of the box and enjoy solving problems. Pursuing a career in science means being passionate about your work, challenging yourself on a regular basis and striving for understanding the unknown.”

Papul Koirala
BSc Electrical and Computer Engineering, 2015

“As you begin working, you will come across exciting opportunities to solve Real-Life problems with the liberty to enjoy after-work hours and the weekend to yourselves. The intercultural environment, internship experiences and survival skills in such a ‘compact’ environment obtained at Jacobs will be a great advantage in navigating the outside world. Make sure to take some time to learn German as well. Job search can be a stressful time but you (bitte 2 Zeilen kürzen))

Wiebke Röhrs
PMO Global Transformation & Transition Management
Bayer
BA Intercultural relations and behavior, 2013

“In our generation we are often told to “Do what we love.” My strategy was rather “Do what you haven’t tried yet and you will find what you love”. I hope to open students’ eyes on trying new things, escaping the straight career path by experimenting and thereby continuously developing…”

Ahmad Saeed
Consultant
Accenture Management
BSc Biochemistry and Cell Biology, 2014

“Life after graduation may seem daunting due graduate school and job applications. Fortunately for the Jacobs graduates, this transition does not have to be as challenging. With a diverse alumni network in all academic and professional fields, graduating students would find a helping hand in whichever path they decide to take. Having a fair experience working for top consultancies, I too would be guiding (bitte 4 Zeilen kürzen))

JACOBS CAREER FAIR 2020

15
The Alfred Wegener Institute carries out research in the Arctic and Antarctic as well as in the high and mid latitude oceans. The institute coordinates German polar research and makes available to national and international science important infrastructure, e.g. the research icebreaker “Polarstern” and research stations in the Arctic and Antarctic.

The Institute’s research mission is to improve our understanding of ocean-ice-atmosphere interactions, the animal and plant kingdoms of the Arctic and Antarctic, and the evolution of the polar continents and seas. Given the major role played by these regions within the Earth’s climate system, global change is a central focus of the research effort at AWI.

AWI collaborates in numerous international research programmes and maintains close contacts with many universities and institutes in Europe and farther afield. It sends scientists to other institutes throughout the world, to other research ships and stations, and invites scientists from other nations to cruises aboard “Polarstern”, as well as to Bremerhaven and Potsdam. About a quarter of those participating in “Polarstern” expeditions are scientists from abroad.

We developed a technology to clean conveyor systems using only water and air. We offer B-CLEAN® technologies as a service to varied customers mainly in the area of surface technology, automotive and food and beverage industries. We do business in Germany, Austria, Belgium, Netherlands, Czech Republic. Our focus is to increase our strong portfolio of returning customers, offering services our clients need in order to increase overall production hygiene and keep quality levels steady at highest levels. We accomplish this using state of the art methods and adhere largely to standards set forth in the EFQM and ISO 90001. In addition, we developed a strong network of partners enabling us to move quickly in order to serve our client’s needs. We frequently exhibit our key technologies at trade shows. Naturally, we invest in our future by offering 3 year apprenticeships and are officially licensed to do so by the chamber of commerce of Bremen and Bremerhaven. The companies headquartere is in Hamburg and our workshop and supporting services, such as sales are located in Bremen-Blumenthal.

Using our own technology, we clean conveyor systems as a service. In addition we develop custom cleaning systems for all types of conveyors, again offering this as a service. Our signature services are bundled below our registered trademark “B-CLEAN®”. Our customers include, VW, Skoda, BMW motorcycle and NEFF (Bosch Siemens appliances).

Kent Bridgewater
B.A. Integrated Social Sciences, 2004
The DLR Institute of Technical Thermodynamics, with over 180 employees, conducts research in the field of efficient and resource-saving energy storage and energy conversion. The Energy System Integration Group in Hamburg develops fuel cell systems for stationary and mobile applications. The work includes the selection of suitable components as well as the targeted system design based on design studies and simulations. Derived system architectures are adapted to the specific application and its requirements, for example for on-board power generation and aircraft propulsion. By means of laboratory investigations, fuel cell stacks and fuel cell applications are characterized and transferred into simulation models. Based on these models, further analyses are carried out and used for the design of new energy systems.
Dräger is a leading international company in the fields of medical and safety technology. Since 1889, Dräger has been developing advanced technical devices and solutions trusted by users all over the world. No matter where Dräger products are used, it’s always about life. Whether for use in clinical, industrial or mining applications, in firefighting or rescue services, Dräger products protect, support and save lives.

The product range of the medical division includes anesthesia workstations, ventilators, OR lights, patient monitors, hospital IT solutions, gas management systems as well as incubators and warming beds for neonates.

The Dräger safety division offers integrated hazard management, in particular for personal protection and plant safety. The current portfolio includes stationary and portable gas detection systems, respiratory protection equipment, fire training systems, professional diving equipment as well as breath alcohol and drug detection systems.
Entrepreneur First is the world’s leading talent investor. We invest time and money in the world’s most talented and ambitious individuals, helping them to find a co-founder, develop an idea, and start a company. So far, we’ve helped 2,000+ people create 300+ companies, worth a combined $2bn. We bring together an extraordinary collection of people, from experienced industry experts to top technologists and academics — and even extraordinary people right at the start of their careers. Ambitious individuals have joined from Google and Goldman Sachs, Alibaba and Amazon, MIT and NUS. All of them saw starting a company as the best way to maximise their impact. Entrepreneur First is backed by Reid Hoffman (founder of LinkedIn), the founders of DeepMind and PayPal, and some of the top investors in the world.
ESMT Berlin was founded by 25 leading global companies and institutions and is one of the top ranked business schools in Germany with a global network of alumni in over 50 countries. The business school offers four degree programs: A two-year Master’s in Management (MIM); a one-year Full-time MBA, a part-time MBA in Business Innovation in blended format and a part-time Executive MBA.

The MIM, designed for candidates with 0-18 months of work experience, is a two-year program entirely taught in English. It teaches general advanced management skills, regardless of previous studies. Courses are divided into two tracks: Quantitative Business, and Innovative Management. Within these two tracks, students choose among four specializations: Business Analytics, Finance & Investments, Entrepreneurship & Innovation, and Global & Digital Strategy.

The MIM allows for students to gain up to 10 months of practical experience, through a mandatory internship and participation in the Social Impact Project.

Furthermore, students may choose to earn a Double Degree at the Yale School of Management by completing the first MIM year in Berlin, and the second year at Yale.

International exchanges are also possible by attending electives at partner schools IE in Spain, Imperial College in the UK, Singapore Management University, and the Smith School of Business at Queen’s University in Canada.

The program is internationally recognized by the highly regarded rankings of The Economist, as well as the Financial Times, ranking in the top 35 of both competitive rankings.
The European Union employs approximately 43,000 people from 28 member states. About 32,000 employees are working at the European Commission, 7,500 at the European Parliament and 3,500 at the Council. There are several entry levels when it comes to working for an EU institution.

The AST (Assistants) with no university degree required and AD (Administrators) with a Bachelor degree required. In general, if one wants to apply at a EU institution, they do so via https://epso.europa.eu. The selection procedure consists of a so-called “concours” (online application, assessment center, job interview). Working for the EU offers a lot of advantages: an international work environment, the possibility to shape Europe together, a good work-life balance, family support and many other benefits.
The Federal Employment Agency (Bundesagentur für Arbeit – BA) is the largest provider of labour market services in Germany. It has a network of more than 700 agencies and branch offices nationwide. Our most important tasks are job and training placement, career counselling and providing benefits replacing employment income such as unemployment benefit and insolvency payments. The Family Benefits Office (Familienkasse), which provides child benefit, is also part of the Federal Employment Agency.

The "Freiwilligen-Agentur-Bremen" is the first address in Bremen for volunteer work. We offer a database with appr. 400 potential volunteer jobs in different sectors from different organisations (www.engagementboerse.de). Besides that we are counselling volunteers and organisations in the field of voluntary work and offer own voluntary projects like f.e. the mentoring project "Balu und Du", in which students accompany elementary school kids.
Passion for service and technology
The Fricke group is one of the largest private enterprises in the agricultural machinery industry and is very successful in many areas today. In the course of its almost 100-year history, the family company has developed from a traditional agricultural machinery dealer to a successful international wholesaler for agricultural machinery, garden technology, commercial vehicles and spare parts. With 2,721 employees — spread over 64 locations in 25 countries — we are working together to further expand our market position.

Digitalisation and e-commerce
As a wholesaler of original parts and identparts for all brands throughout Europe, we have been operating an e-commerce platform since 2004 and are continuously developing it further, in order to be able to offer our customers an unrivaled product range tailored to their needs. 95 percent of the orders are placed online, and the webshop is mainly managed by our own development team in Bremen.

Our benefits
We work in several agile teams using trend-setting technologies according to modern principles. The working environment is characterized by flat hierarchies, short decision-making paths and communication on eye level. In addition, there are benefits such as modern workplace equipment, flexible working hours and exclusive events.
The Society for the Promotion of Adventure Pedagogy with its facility erlebnistage is an association with over 30 years of experience in the upbringing and education of children and adolescents as well as in the training and further education of adults.

We are Germany’s largest non-profit provider of experiential education courses, programs and trainings with 30,000 participants per year. We currently operate three locations in Germany.

Set up and implementation of Adventure based learning mainly for school and group trips.

Number of employees: 50–120 during the season

HandEX is revolutionising the market by using leading technology, to revamp processes and make it as easy as possible for exporters and importers alike to access the financing they need for international trade. Today, if an exporter would like to search for financing for their exports, particularly to emerging markets for loans for an amount under EUR 5M (“small tickets”), they are frequently turned away by their bank. As much as 50% of “small-ticket” export finance loans are rejected by banks, even before appraisal.

HandEX is targeting SMEs with a mid- to long-term financing requirement of up to EUR 5M. Having founded less than a year ago, the team has built strong relationships with financing banks and insurance companies. HandEX facilitates and integrates the issuance of export loans and export insurance covers, including guarantees issued by the German government, for which the export credit agency Euler Hermes is mandated.

HandEX’s goal is to become the global export finance partner for SMEs, particularly “hidden champions”, to compete on the global stage. Many of these “hidden champions” in Europe, lose out to bids from other regions due to lack of corresponding financing products.
The Hertie School is an international teaching and research centre of excellence located in vibrant and cosmopolitan Berlin. Exceptional teaching, research and outreach on international and intersectoral governance challenges are the school’s hallmark.

Our motto is Understand today. Shape tomorrow. We attract a highly talented student body from diverse national and disciplinary backgrounds — united by a desire to make a difference and to bring about a better future. We offer them a study environment characterised by close interaction with faculty, lively public debates and engagement with current policy developments. In addition, our students have access to the School’s global network that includes the London School of Economics and Political Science, Sciences Po in Paris, Columbia University in New York and many other excellent public policy schools worldwide.

As an ambassador of good governance and public stewardship, the Hertie School has become a hub for top scholars and researchers, as well as experts and representatives from the spheres of politics, business and civil society who contribute to events at the school. Our students actively contribute to these debates and regularly spearhead their own initiatives to foster the public good.

Holidu is one of the fastest-growing travel tech companies worldwide. Our mission is to finally make the search and booking of vacation rentals easy. Holidu’s search engine uses proprietary image recognition technology to compare the prices of millions of rental properties across hundred websites including Airbnb, Booking.com and HomeAway. This enables users to quickly find the ideal accommodation and to save up to 55% on their booking. The company also helps vacation rental owners multiply their bookings with less work through its independent software and service solution under the Bookiply brand. Bookiply serves vacation rental owners by distributing properties to the largest travel websites, synchronizing calendars, and creating multilingual descriptions as well as professional photos. A team of experts also takes over traveler communication and helps owners maximize revenues.
The Institute for Chemistry and Biology of the Marine Environment (ICBM) at the University of Oldenburg is an interdisciplinary research institute, dealing with fundamental and applied issues in marine and environmental research. The ICBM aims at understanding the value of marine environmental systems through close cooperation of the various scientific disciplines (chemistry, biology, physics, modelling) of its research groups. The research focuses on marine biogeochemical cycles and energy fluxes in the water and sediment and at the boundary layers between habitats and water masses as well as the functional role of marine biodiversity.

The ICBM enables an interdisciplinary and research-oriented training of future marine scientists by closely involving them in the institute’s research activities. The interdisciplinary study courses Environmental Sciences (Bachelor) and Marine Environmental Science (Master) offer a broad spectrum of fundamental scientific knowledge, training in modern methods of marine research and high flexibility in various study paths. More focused teaching activities are embedded in the international study course Microbiology as well as the Master programmes Marine Sensors and Environmental Modelling. The promotion of young researchers has a high value at the ICBM. The ICBM offers PhD students excellent working conditions and enables them to participate in a coordinated graduate training as part of a PhD programme “Environmental Sciences and Biodiversity”.

As the world leader in secure vehicle identification, we offer customized solutions tailored to individual needs and requirements. Thanks to our modular security systems and products, our services cover all areas of vehicle identification. Whether registration, production, distribution or administration – we have the right solution at hand and work to the highest quality and safety standards. Our technologies and security solutions are used on every continent. We locally produce license plates according to the countries’ respective standards, develop machines, tools, and materials – as well as export them to a multitude of countries. In many nations, we fulfil government contracts regarding vehicle registration and identification.

KPMG is a network of professional firms with about 200,000 employees in 154 countries and territories.

In Germany too, KPMG is one of the leading auditing and advisory firms and has around 10,700 employees at 25 locations. Our services are divided into the following functions: Audit, Tax, Consulting and Deal Advisory.

Our Audit services are focused on the auditing of consolidated and annual financial statements. The Tax function incorporates the tax advisory services provided by KPMG. Our high level of specialist know-how on business, regulatory and transaction-related issues is brought together within our Consulting and Deal Advisory functions.

We have established teams of interdisciplinary specialists for key industries of the economy. These pool the experience of our experts around the world and further enhance the quality of our advisory services.
International Max Planck Research School of Marine Microbiology (IMPRS MarMic)

The International Max Planck Research School of Marine Microbiology (MarMic) is an MSc / PhD graduate program for highly qualified and motivated national and international students. MarMic is a joint program of the Max Planck Institute for Marine Microbiology, the University of Bremen, the Alfred Wegener Institute for Polar and Marine Research, and the Jacobs University Bremen. MarMic teaches students to take an interdisciplinary approach to the understanding of marine prokaryotic and eukaryotic microbiology, offering training in physiology, ecology, evolution, molecular biology, bioinformatics, and other related subjects.

The MarMic concept is unique: we are educating a new generation of marine scientists, and providing them with the tools to better understand microbial life and the matter in which it affects our biosphere. MarMic students are trained to think globally and to choose from both holistic and reductionistic research approaches. The breadth of theoretical and practical experiences at MarMic enables students to address questions ranging from biogeochemistry to genomic analysis, from single-cell interactions to behavior in mixed communities. These abilities make MarMic students attractive scientists for international research teams, institutes, universities, and industry.

Mercedes-Benz Cars offers the ideal automobile for every need: from the high-quality compact cars from smart, and
the premium vehicles from Mercedes-Benz and Mercedes Maybach, to the sporty Mercedes-AMG. Five strong truck
brands (Mercedes-Benz, Freightliner, FUSO, Western Star, BharatBenz) are bundled under the umbrella of Daimler Trucks,
offering future-oriented technologies and tailor-made products for diverse areas of use. Be it the Citan city delivery Van, the
mid-size Vito Van or the large Sprinter Van — the commercial vehicles from Mercedes-Benz Vans stand for a high level
of reliability, quality and value retention. With our full-line offers from the Mercedes-Benz, Setra and BharatBenz brands,
Daimler Buses covers all requirements in the bus segment.
With the OMNIplus and BusStore brands, we additionally have access to a global service network and full coverage service
line, including trade with used buses.

Daimler AG is one of the world’s most successful automotive companies. With its divisions Mercedes-Benz AG (Mercedes-
Benz Cars & Vans), Daimler Truck AG (Daimler Trucks & Buses) and the Daimler Mobility AG, this vehicle manufacturer is
one of the biggest providers of premium cars and the world’s biggest manufacturer of commercial vehicles with a global
reach.
OneSubsea GmbH

OneSubsea delivers integrated solutions, products, systems and services for the subsea oil and gas market. Our company offers a step change in reservoir recovery for the subsea oil and gas industry through integration and optimization of the entire production system over the life of the field. OneSubsea leverages Cameron’s flow control expertise, process technologies and world-class manufacturing and aftermarket capabilities, along with Schlumberger’s petro-technical leadership, reservoir and production technology, and R&D capabilities.

PageGroup is a world-leading specialist recruitment consultancy, specializing in the placement of candidates in permanent, contract, temporary and interim positions with clients around the world. PageGroup is represented globally by over 7,500 employees working out of 141 offices in 36 countries. At the heart of our business are the thousands of people’s lives we change, the outstanding service we provide to our clients and candidates.
SMS group is a global, leading partner for the metals industry and ranks as one of the largest employers in the field of plant construction and mechanical engineering for the industrial processing of steel, aluminum, and non-ferrous metals. As a family-owned business headquartered in Germany, quality and innovation are in our DNA. Around 14,000 employees in 50 countries generate worldwide sales of more than EUR 2.8 billion.

As the “Leading Partner in the World of Metals”, we apply our technical expertise to create innovative, pioneering solutions for our customers. With these we drive global megatrends that include mobility, urbanization, sustainability, and connectivity. This is where we utilize the disruptive power of new growth sectors, such as additive manufacturing, sustainable production concepts, and revolutionary innovations for container terminals. In our steady pursuit of digitalization, we work intensively on digitalized and connected processes, and our portfolio already includes “learning steel plants”.

The people at SMS group are the foundation on which our success is built. The global market leader SMS group and its start-up enterprise, SMS digital, offer fast-track career prospects to creative talents — worldwide. Join us in revolutionizing the metals industry. We look forward to meeting you.
We are TalentBait, a technology company from Hamburg. From our headquarters at Axel-Springer-Platz in Neustadt, we help companies across Germany to advertise their jobs on social media and thus find the right applicants. Intelligent and sustainable recruitment is more important than ever in times of a shortage of skilled workers and we are convinced that our modern approach will make traditional recruitment channels such as job exchanges redundant.
Teach First Deutschlan

Teach First Germany (TFD) shows that young people can be successful in social hot spots. University graduates from various fields of study work as fellows nationwide at schools with special challenges. As additional teachers in class and full-time, they support pupils especially where they often fail by transitions in the education system.

Fellows are selected in a multi-stage process, prepared for three months for the two-year school assignment, and accompanied and trained as part of the leadership program of Teach First Germany. The commitment to Teach First Germany shapes a generation of responsible individuals who then campaign with the alumni network for better educational opportunities. Together with over 50 other independent country organizations, Teach First Germany is part of the international network Teach For All.

TNG Technology Consulting is a value-based consulting partnership focused on high-end information technology. We support our customers with up-to-date tools and innovative ideas. Our mission is to analyze and solve the strategic or routine IT problems our customers have. By relying on teamwork, agile methods and fast communication, each customer can access the expertise pool of the whole company. We are looking for interns and fulltime employees working in projects for a wide variety of customers. Our projects include requirements analysis, software architecture and design, implementation, testing, integration, rollout, maintenance and operations of large software systems. Besides agile software development in general, we also have some projects in the area of artificial intelligence as well as DevOps and Cloud.

Much of our work is focused on Java and JavaScript, but we also work with Perl, Python, C#, Kotlin, Rust and PHP.

Marie Haude
B.A. Integrated Social Sciencess, 2009
We ignite opportunity by setting the world in motion. Good things happen when people can move, whether across town or towards their dreams. Opportunities appear, open up, become reality. What started as a way to tap a button to get a ride has led to billions of moments of human connection as people around the world go all kinds of places in all kinds of ways with the help of our technology.

Get a first-hand perspective of what it is like working in a global high growth company by joining the presentation with EMEA Campus Recruiting Lead Sebastian Prieto Tovar. We will discuss not only what Uber’s future plans are, but also what opportunities for both internships and full-time positions we are currently looking for.
Ubimax GmbH

Ubimax is the leading provider of fully integrated industrial augmented reality (AR) solutions. The solution platform Ubimax Frontline improves manual work processes across industries along the entire value chain on the basis of the latest wearable computing technologies. Ubimax Frontline consists of four core solutions: xPick, xMake, xAssist, and xInspect. They are designed to consciously empower the human worker in an increasingly digitized working environment and are today used by more than 400 customers worldwide.

Ubimax has developed a very unique company culture, which is strongly characterized by diversity. In the Bremen-based IT company, 100 creative minds from 17 nations work together successfully towards one goal: to mature AR and wearables into global industry standards. The office languages are English and German. From interns to top management, the “Du” (quite personal level for Germans to address each other) is as much a part of the company’s everyday office life as the waiving of wardrobe regulations. The general flextime model with core working hours and the possibility of home office days offers employees a very good work-life balance. Regular team events such as Christmas and summer parties, as well as an annual Kohltour (If you don’t know what that is, come and ask us!) or spontaneous in-house events contribute to continuous team building.
We are a global energy company that generates, trades, and markets energy on a large scale. We also procure, store, transport, and supply commodities such as natural gas, LNG, and coal as well as energy-related products.

What is special about our capabilities is that we can provide both technical and commercial expertise at the same time.

We look for innovative solutions and believe in the advantages offered by digitalization. Using our broad portfolio, with elements perfectly complementing each other, we create value for our customers. We offer tailor-made energy solutions and free our customers from having to worry about the complex energy issues they face.

And we do this more simply and better than others. We act responsibly in everything we do. We are a team of doers who achieve their goals with energy and passion.

Uniper means providing tailor-made solutions — for the complex world of energy.

Anil Shah
B.A. Integrated Social Sciences, 2012
Yelp is a website and mobile app that makes it easy for users to connect with awesome local businesses. Founded in 2004, Yelp has taken root in countries across the globe as the leading local guide for real word-of-mouth on everything from boutiques and mechanics to restaurants and dentists. Today, Yelp has 38M+ unique mobile visitors and 92M+ unique desktop visitors every month. Keeping things running smoothly requires the best and brightest in the industry. Our engineers come from diverse technical backgrounds and value open source and creative problem solving. They write tests, review code, and push daily to keep Yelp the richest source of local data out there.
Our company name reminds us that digitalization leads to fundamental change, moving from traditional paradigms to unprecedented new realities. A creative mindset and agile way of working is necessary to tap that potential. zeroG (founded in 2015) is a subsidiary of Lufthansa Systems and is dedicated to unlocking the intrinsic power of data to improve the world of aviation.

At zeroG, everyone is encouraged to explore their creativity and personal potential, by taking up different roles and drive great ideas forward. We champion self-initiative over a rigid hierarchy and celebrate ownership over delegating responsibilities. We have a digitally-fit mentality, focused on collaboration and adaptability to meet the challenges and opportunities of an ever-changing world.
