# WELCOME ADDRESS

Dear students, dear exhibitors,

Like most things in today's world, the labor market is ever evolving. Rapid technological changes, globalization as well as digitization, have had a profound effect on how employers and candidates connect. In many ways, it has made the initial contact easier – in others, it has created an enormous cloud of choices, which makes looking for the best job or the most qualified applicant feel like searching for the proverbial needle in the haystack.

Jacobs Career Fair is a place where employers and specialized talent meet in person. Organizations, from a wide variety of size, sector, and work area, have the chance to talk to our highly educated, aspiring and internationally oriented students. Living and learning on a diverse campus of more than 120 nationalities has shaped them into forward-thinking young individuals, equipped with sound expertise in their respective fields, paired with leadership and intercultural skills. On the other side, our exhibitors, global companies, start-ups, regional companies, non-profit organizations, and research institutions alike, inform, discuss and promote the job opportunities they offer. The Jacobs Career Fair is a place where supply and demand meet and, ideally, lead to a flourishing exchange.

Now in its sixth year, the Jacobs Career Fair offers, besides the fair, a variety of workshops and career talks. Experienced human resources professionals and experts, among them numerous alumni of Jacobs University, provide first-hand insights and answer questions about application strategies, entrepreneurship, and labor market needs.

Our Career Fair is a land of opportunities – for students, alumni, and employers alike. I am confident that you will find what you are looking for and wish you all inspiring and successful talks.

Best regards,

Prof. Dr. Antonio Loprieno

---

**Stefan Rustler**

Alumni Association President  
Class of 2012

---

# WELCOME ADDRESS

**Dear students,**

In today's rapidly growing and evolving job market, universities have the challenging task of preparing students for the exciting, yet unpredictable future. Our alma mater provides you with a myriad of opportunities to explore your professional future. Be it company recruiting events or the largest event on campus, today's Jacobs Career Fair, everyone can benefit from taking part in such events and understanding what is out there.

Beyond this, the Jacobs Alumni Association can offer you a network that can prove helpful at any point in life and in multiple facets. Many alumni are back on campus today, and I can assure you, that every one of them is looking forward to meeting you and making you a part of their network. Speak to them, interact with them, share your career aspirations with them. They have been where you are and can help you get to where you want to go.

Our global alumni community is fueled by our passion to help each other grow, and even more so, by the opportunity to help younger generations of Jacobians. For alumni, coming back to campus for the Career Fair is an opportunity to see this passion in action and a chance to share the knowledge they have acquired after leaving Jacobs. With varied expertise and diverse backgrounds, alumni will be able to provide you with scores of insights into today's labor market and show you how to leverage the experience and knowledge you gain at Jacobs to your advantage.

We wish you luck with your first steps into the job market and a very successful Jacobs Career Fair!

A handwritten signature in black ink, appearing to read 'Stefan Rustler'.

Stefan Rustler

**Janina Marahrens-Hashagen**

President of the Bremen Chamber of Commerce –  
IHK for Bremen and Bremerhaven

---

## WELCOME ADDRESS

Highly dynamic changes in market and competitive conditions pose major challenges for the economy. More than ever, companies are forced to act agile. Knowledge and innovation must be placed at the center of strategic corporate decisions in order to maintain and expand competitiveness in the future.

In their innovation efforts, companies can draw on an excellent, growing network of science and research facilities here in Bremen. Above all, they benefit from the large pool of well-educated graduates of the universities in the state of Bremen. Since innovation processes focus on people who dare to do something new with courage, creativity and initiative, the transfer of ideas from person to person and an effective transition from the universities into the economy is a key success factor for companies.

Jacobs University Bremen provides us with a pool of qualified employees for the economy. With their “Jacobs Career Fair” event, companies from Bremen will have an excellent platform to gather international talents. Companies from various different industries have the opportunity to meet these well-qualified and motivated young academics. Students have the occasion to talk to their potential employers and can find out about the entry and career opportunities that are important for their personal growth. The “Jacobs Career Fair” is a great opportunity for these young academics and corporate representatives: they can get in touch with each other to exchange about their future perspectives. In light of this, I hope that all the participants of this event have interesting discussions and that they establish new, valuable relationships.

Janina Marahrens-Hashagen

# JACOBS UNIVERSITY ALUMNI ASSOCIATION

---

We are the worldwide networking community of Jacobs University Alumni. Join us at our booth at the Jacobs Career Fair and at <https://portal.jacobs-alumni.de>  
**[www.jacobs-alumni.de](http://www.jacobs-alumni.de)**

Studying at Jacobs University gives personal contacts and professional connections, often for the whole life. The Jacobs University Alumni Association was founded by the first graduating class in 2004 with the aim to foster relationships between students after graduation, to create and nurture a lifelong bond between the university and its graduates, as well as to support current and future generations of students.

All members of the Alumni Association have the opportunity to share contacts, stories and expertise with other individuals who consider Jacobs University a lifelong home. An online account for keeping in touch with all graduates and classmates, yearly Homecoming and Class Reunions on campus, a growing number of local chapters in more and more cities around Europe and worldwide, and many other opportunities to get involved and to benefit from exclusive services: all this gives rise to the broad, multicultural, international networking community of Jacobs University Alumni.

# ALUMNI CAREER TALK

---

## Ina Huppertz

Postdoc Fellow  
The European Molecular  
Biology Laboratory  
BSc Biochemistry and  
Cell Biology, 2012

---

“The transdisciplinary and multicultural environment at Jacobs has inspired me to take up a career in the academic sciences and contribute to the understanding of fundamental processes underlying our life. Science needs intelligent and hard-working people, who can think outside of the box and enjoy solving problems. Pursuing a career in science means being passionate about your work, challenging yourself on a regular basis and striving for understanding the unknown.”

---

## Papul Koirala

BSc Electrical and  
Computer Engineering,  
2015

---

“The intercultural mix and survival skills in such a ‘compact’ environment obtained at Jacobs will be a great advantage. As you begin working, you will come across exciting opportunities to solve Real-Life problems. The job search can be a stressful time, but you will realize that in some cities finding a good apartment will be just as challenging as finding the job itself.”

---

## Wiebke Röhrs

PMO Global Trans-  
formation & Transition  
Management  
Bayer  
BA Intercultural Relations  
and Behavior, 2013

---

“In our generation we are often told to “Do what we love.” My strategy was rather “Do what you haven’t tried yet and you will find what you love”. I hope to open students’ eyes on trying new things, escaping the straight career path by experimenting and thereby continuously developing ...”

---

## Ahmad Saeed

Consultant  
Accenture Management  
BSc Biochemistry and  
Cell Biology, 2014

---

“With a diverse alumni network in all academic and professional fields, Jacobs graduates would find a helping hand in whichever path they decide to take after graduation. Having a fair experience working for top consultancies, I too would be guiding interested students towards a career in consultancy at the Jacobs Career Fair. I’m especially looking forward to explaining how I decided to be one, how I got a job as a consultant, and what my daily tasks look like.”

---

## COMPANIES FROM A–Z

# Alfred-Wegener-Institut Helmholtz-Zentrum für Polar- und Meeresforschung

Research

Number of employees: 1,200

[www.awi.de/en/work-study](http://www.awi.de/en/work-study)

The Alfred Wegener Institute carries out research in the Arctic and Antarctic as well as in the high and mid latitude oceans. The institute coordinates German polar research and makes available to national and international science important infrastructure, e.g. the research icebreaker “Polarstern” and research stations in the Arctic and Antarctic.

The Institute’s research mission is to improve our understanding of ocean-ice-atmosphere interactions, the animal and plant kingdoms of the Arctic and Antarctic, and the evolution of the polar continents and seas. Given the major role played by these regions within the Earth’s climate system, global change is a central focus of the research effort at AWI.

AWI collaborates in numerous international research programmes and maintains close contacts with many universities and institutes in Europe and farther afield. It sends scientists to other institutes throughout the world, to other research ships and stations, and invites scientists from other nations to cruises aboard “Polarstern”, as well as to Bremerhaven and Potsdam. About a quarter of those participating in “Polarstern” expeditions are scientists from abroad.

## Bremer Aufbau-Bank GmbH

The STARTHAUS is at the heart of the foundation network and is your first point of contact when founding your own company.

Is your business model viable in the long term?  
Have you looked into all aspects of your start-up?

In joint meetings we check your business model for long-term viability and discuss your particular start-up schedule. In our coaching offices in Bremerhaven and Bremen you can discuss your plans and targets with a designated start-up consultant.

And best of all – it's free!

## BRIGE GmbH

Using our own technology, we clean conveyor systems as a service. In addition we develop custom cleaning systems for all types of conveyors, again offering this as a service. Our signature services are bundled below our registered trademark "B-CLEAN®". Our customers include, VW, Skoda, BMW motorcycle and NEFF (Bosch Siemens appliances).

Number of employees: 10

[www.brige.de/karriere](http://www.brige.de/karriere)

We developed a technology to clean conveyor systems using only water and air. We offer B-CLEAN® technologies as a service to varied customers mainly in the area of surface technology, automotive and food and beverage industries. We do business in Germany, Austria, Belgium, Netherlands, Czech Republic. Our focus is to increase our strong portfolio of returning customers, offering services our clients need in order to increase overall production hygiene and keep quality levels steady at highest levels. We accomplish this using state of the art methods and adhere largely to standards set forth in the EFQM and ISO 90001. In addition, we developed a strong network of partners enabling us to move quickly in order to serve our client's needs. We frequently exhibit our key technologies at trade shows. Naturally, we invest in our future by offering 3 year apprenticeships and are officially licensed to do so by the chamber of commerce of Bremen and Bremerhaven. The companies headquartere is in Hamburg and our workshop and supporting services, such as sales are located in Bremen-Blumenthal.

## Deutsches Zentrum für Luft- und Raumfahrt (DLR)

The DLR Institute of Technical Thermodynamics, with over 180 employees, conducts research in the field of efficient and resource-saving energy storage and energy conversion. The Energy System Integration Group in Hamburg develops fuel cell systems for stationary and mobile applications. The work includes the selection of suitable components as well as the targeted system design based on design studies and simulations. Derived system architectures are adapted to the specific application and its requirements, for example for on-board power generation and aircraft propulsion. By means of laboratory investigations, fuel cell stacks and fuel cell applications are characterized and transferred into simulation models. Based on these models, further analyses are carried out and used for the design of new energy systems.

## Entrepreneur First

Entrepreneurship, Talent Investing,  
Venture Capital

Number of employees: 150

[www.joinef.com/apply-to-ef](http://www.joinef.com/apply-to-ef)

Entrepreneur First is the world's leading talent investor. We invest time and money in the world's most talented and ambitious individuals, helping them to find a co-founder, develop an idea, and start a company. So far, we've helped 2,000+ people create 300+ companies, worth a combined \$2bn. We bring together an extraordinary collection of people, from experienced industry experts to top technologists and academics – and even extraordinary people right at the start of their careers. Ambitious individuals have joined from Google and Goldman Sachs, Alibaba and Amazon, MIT and NUS. All of them saw starting a company as the best way to maximise their impact. Entrepreneur First is backed by Reid Hoffman (founder of LinkedIn), the founders of DeepMind and PayPal, and some of the top investors in the world.

## ESMT Berlin

Business School/ Higher Education, MSc, MBA, EMBA

Number of employees: 250

[degrees.esmt.berlin](https://degrees.esmt.berlin)

ESMT Berlin was founded by 25 leading global companies and institutions and is one of the top ranked business schools in Germany with a global network of alumni in over 50 countries. The business school offers four degree programs: A two-year Master's in Management (MIM); a one-year Full-time MBA, a part-time MBA in Business Innovation in blended format and a part-time Executive MBA.

The MIM, designed for candidates with 0-18 months of work experience, is a two-year program entirely taught in English. It teaches general advanced management skills, regardless of previous studies. Courses are divided into two tracks: Quantitative Business, and Innovative Management. Within these two tracks, students choose among four specializations: Business Analytics, Finance & Investments, Entrepreneurship & Innovation, and Global & Digital Strategy.

The MIM allows for students to gain up to 10 months of practical experience, through a mandatory internship and participation in the Social Impact Project.

Furthermore, students may choose to earn a Double Degree at the Yale School of Management by completing the first MIM year in Berlin, and the second year at Yale.

International exchanges are also possible by attending electives at partner schools IE in Spain, Imperial College in the UK, Singapore Management University, and the Smith School of Business at Queen's University in Canada.

The program is internationally recognized by the highly regarded rankings of The Economist, as well as the Financial Times, ranking in the top 35 of both competitive rankings.

## European Institutions

The European Union employs approximately 43,000 people from 28 member states. About 32,000 employees are working at the European Commission, 7,500 at the European Parliament and 3,500 at the Council. There are several entry levels when it comes to working for an EU institution.

The AST (Assistants) with no university degree required and AD (Administrators) with a Bachelor degree required. In general, if one wants to apply at a EU institution, they do so via <https://epso.europa.eu>. The selection procedure consists of a so-called “concours” (online application, assessment center, job interview). Working for the EU offers a lot of advantages: an international work environment the possibility to shape Europe together, a good work-life balance, family support and many other benefits.

## Fricke Holding GmbH

E-commerce & international trade in agricultural machinery, garden technology, commercial vehicles and spare parts

Number of employees: 2,721

[www.karriere.fricke.de](http://www.karriere.fricke.de)

### Passion for service and technology

The Fricke group is one of the largest private enterprises in the agricultural machinery industry and is very successful in many areas today. In the course of its almost 100-year history, the family company has developed from a traditional agricultural machinery dealer to a successful international wholesaler for agricultural machinery, garden technology, commercial vehicles and spare parts. With 2,721 employees – spread over 64 locations in 25 countries – we are working together to further expand our market position.

### Digitalisation and e-commerce

As a wholesaler of original parts and identparts for all brands throughout Europe, we have been operating an e-commerce platform since 2004 and are continuously developing it further, in order to be able to offer our customers an unrivaled product range tailored to their needs. 95 percent of the orders are placed online, and the webshop is mainly managed by our own development team in Bremen.

### Our benefits

We work in several agile teams using trend-setting technologies according to modern principles. The working environment is characterized by flat hierarchies, short decision-making paths and communication on eye level. In addition, there are benefits such as modern workplace equipment, flexible working hours and exclusive events.

**HANDEX**

## HandEX GmbH

Export Financing, Fintech, Machine learning

Number of employees: 8

[www.handexgmbh.recruitee.com](http://www.handexgmbh.recruitee.com)

HandEX is revolutionising the market by using leading technology, to revamp processes and make it as easy as possible for exporters and importers alike to access the financing they need for international trade. Today, if an exporter would like to search for financing for their exports, particularly to emerging markets for loans for an amount under EUR 5M (“small tickets”), they are frequently turned away by their bank. As much as 50% of “small-ticket” export finance loans are rejected by banks, even before appraisal.

HandEX is targeting SMEs with a mid- to long-term financing requirement of up to EUR 5M. Having founded less than a year ago, the team has built strong relationships with financing banks and insurance companies. HandEX facilitates and integrates the issuance of export loans and export insurance covers, including guarantees issued by the German government, for which the export credit agency Euler Hermes is mandated.

HandEX’s goal is to become the global export finance partner for SMEs, particularly “hidden champions”, to compete on the global stage. Many of these “hidden champions” in Europe, lose out to bids from other regions due to lack of corresponding financing products.

## Hertie School of Governance

Higher Education

Number of employees: 250

[www.hertie-school.org/study](http://www.hertie-school.org/study)

The Hertie School is an international teaching and research centre of excellence located in vibrant and cosmopolitan Berlin. Exceptional teaching, research and outreach on international and intersectoral governance challenges are the school's hallmark.

Our motto is Understand today. Shape tomorrow. We attract a highly talented student body from diverse national and disciplinary backgrounds – united by a desire to make a difference and to bring about a better future. We offer them a study environment characterised by close interaction with faculty, lively public debates and engagement with current policy developments. In addition, our students have access to the School's global network that includes the London School of Economics and Political Science, Sciences Po in Paris, Columbia University in New York and many other excellent public policy schools worldwide.

As an ambassador of good governance and public stewardship, the Hertie School has become a hub for top scholars and researchers, as well as experts and representatives from the spheres of politics, business and civil society who contribute to events at the school. Our students actively contribute to these debates and regularly spearhead their own initiatives to foster the public good.

# Institute for Chemistry and Biology of the Marine Environment (ICBM)

Carl von Ossietzky University Oldenburg

The Institute for Chemistry and Biology of the Marine Environment (ICBM) at the University of Oldenburg is an interdisciplinary research institute, dealing with fundamental and applied issues in marine and environmental research. The ICBM aims at understanding the value of marine environmental systems through close cooperation of the various scientific disciplines (chemistry, biology, physics, modelling) of its research groups. The research focuses on marine biogeochemical cycles and energy fluxes in the water and sediment and at the boundary layers between habitats and water masses as well as the functional role of marine biodiversity.

The ICBM enables an interdisciplinary and research-oriented training of future marine scientists by closely involving them in the institute's research activities. The interdisciplinary study courses Environmental Sciences (Bachelor) and Marine Environmental Science (Master) offer a broad spectrum of fundamental scientific knowledge, training in modern methods of marine research and high flexibility in various study paths. More focused teaching activities are embedded in the international study course Microbiology as well as the Master programmes Marine Sensors and Environmental Modelling. The promotion of young researchers has a high value at the ICBM. The ICBM offers PhD students excellent working conditions and enables them to participate in a coordinated graduate training as part of a PhD programme "Environmental Sciences and Biodiversity".

## International Max Planck Research School of Marine Microbiology (IMPRS MarMic)

The International Max Planck Research School of Marine Microbiology (MarMic) is an MSc / PhD graduate program for highly qualified and motivated national and international students. MarMic is a joint program of the Max Planck Institute for Marine Microbiology, the University of Bremen, the Alfred Wegener Institute for Polar and Marine Research, and the Jacobs University Bremen. MarMic teaches students to take an interdisciplinary approach to the understanding of marine prokaryotic and eukaryotic microbiology, offering training in physiology, ecology, evolution, molecular biology, bioinformatics, and other related subjects.

The MarMic concept is unique: we are educating a new generation of marine scientists, and providing them with the tools to better understand microbial life and the matter in which it affects our biosphere. MarMic students are trained to think globally and to choose from both holistic and reductionistic research approaches. The breadth of theoretical and practical experiences at MarMic enables students to address questions ranging from biogeochemistry to genomic analysis, from single-cell interactions to behavior in mixed communities. These abilities make MarMic students attractive scientists for international research teams, institutes, universities, and industry.

Plant construction and mechanical engineering for the industrial processing of steel, aluminum, and non-ferrous metals; Technical Service; Electrics and Automation; Digitalization; Additive Manufacturing

Number of employees: Around 14,000

[www.sms-group.com/sms-group/career](http://www.sms-group.com/sms-group/career)

SMS group is a global, leading partner for the metals industry and ranks as one of the largest employers in the field of plant construction and mechanical engineering for the industrial processing of steel, aluminum, and non-ferrous metals. As a family-owned business headquartered in Germany, quality and innovation are in our DNA. Around 14,000 employees in 50 countries generate worldwide sales of more than EUR 2.8 billion.

As the “Leading Partner in the World of Metals”, we apply our technical expertise to create innovative, pioneering solutions for our customers. With these we drive global megatrends that include mobility, urbanization, sustainability, and connectivity. This is where we utilize the disruptive power of new growth sectors, such as additive manufacturing, sustainable production concepts, and revolutionary innovations for container terminals. In our steady pursuit of digitalization, we work intensively on digitalized and connected processes, and our portfolio already includes “learning steel plants”.

The people at SMS group are the foundation on which our success is built. The global market leader SMS group and its start-up enterprise, SMS digital, offer fast-track career prospects to creative talents – worldwide. Join us in revolutionizing the metals industry. We look forward to meeting you.

## TalentBait

---

NLP, HR-TECH

Number of employees: 5

[angel.co/company/visualino-ug/jobs](https://angel.co/company/visualino-ug/jobs)

We are TalentBait, a technology company from Hamburg. From our headquarters at Axel-Springer-Platz in Neustadt, we help companies across Germany to advertise their jobs on social media and thus find the right applicants. Intelligent and sustainable recruitment is more important than ever in times of a shortage of skilled workers and we are convinced that our modern approach will make traditional recruitment channels such as job exchanges redundant.

## Teach First Deutschland

Educational NGO, leadership program, leadership training, workshop scholarship, social change

Number of employees: 61 and 216 Fellows

[www.teachfirst.de/bewerben](http://www.teachfirst.de/bewerben)

Teach First Germany (TFD) shows that young people can be successful in social hot spots. University graduates from various fields of study work as fellows nationwide at schools with special challenges. As additional teachers in class and full-time, they support pupils especially where they often fail: by transitions in the education system.

Fellows are selected in a multi-stage process, prepared for three months for the two-year school assignment, and accompanied and trained as part of the leadership program of Teach First Germany. The commitment to Teach First Germany shapes a generation of responsible individuals who then campaign with the alumni network for better educational opportunities. Together with over 50 other independent country organizations, Teach First Germany is part of the international network Teach For All.

Mr. Sebastian Prieto  
Campus Recruitment  
[sebastian.prieto@uber.com](mailto:sebastian.prieto@uber.com)

We ignite opportunity by setting the world in motion. Good things happen when people can move, whether across town or towards their dreams. Opportunities appear, open up, become reality. What started as a way to tap a button to get a ride has led to billions of moments of human connection as people around the world go all kinds of places in all kinds of ways with the help of our technology.

Get a first-hand perspective of what it is like working in a global high growth company by joining the presentation with EMEA Campus Recruiting Lead Sebastian Prieto Tovar. We will discuss not only what Uber's future plans are, but also what opportunities for both internships and full-time positions we are currently looking for.

## Ubimax GmbH

Software Development, Marketing (B2B),  
Sales, Customer Success, Human Resources

Number of employees: 100

[www.ubimax.com/en/career](http://www.ubimax.com/en/career)

Ubimax is the leading provider of fully integrated industrial augmented reality (AR) solutions. The solution platform Ubimax Frontline improves manual work processes across industries along the entire value chain on the basis of the latest wearable computing technologies. Ubimax Frontline consists of four core solutions: xPick, xMake, xAssist, and xInspect. They are designed to consciously empower the human worker in an increasingly digitized working environment and are today used by more than 400 customers worldwide.

Ubimax's developed a very unique company culture, which is strongly characterized by diversity. In the Bremen-based IT company, 100 creative minds from 17 nations work together successfully towards one goal: to mature AR and wearables into global industry standards. The office languages are English and German. From interns to top management, the "Du" (quite personal level for Germans to address each other) is as much a part of the company's everyday office life as the waiving of wardrobe regulations. The general flexitime model with core working hours and the possibility of home office days offers employees a very good work-life balance. Regular team events such as Christmas and summer parties, as well as an annual Kohltour (If you don't know what that is, come and ask us!) or spontaneous in-house events contribute to continuous team building.

## Uniper SE (Uniper IT GmbH)

Energy, Power Generation, Energy/Commodity  
Sales & Trading, Gas Storage

Number of employees: 14,000

[www.uniper.energy/company/careers](http://www.uniper.energy/company/careers)

We are a global energy company that generates, trades, and markets energy on a large scale. We also procure, store, transport, and supply commodities such as natural gas, LNG, and coal as well as energy-related products.

What is special about our capabilities is that we can provide both technical and commercial expertise at the same time.

We look for innovative solutions and believe in the advantages offered by digitalization. Using our broad portfolio, with elements perfectly complementing each other, we create value for our customers. We offer tailor-made energy solutions and free our customers from having to worry about the complex energy issues they face.

And we do this more simply and better than others. We act responsibly in everything we do. We are a team of doers who achieve their goals with energy and passion.

Uniper means providing tailor-made solutions – for the complex world of energy.

## Yelp GmbH

---

Internet, IT

Number of employees: 5,000

[yelp.com/careers](https://www.yelp.com/careers)

Yelp is a website and mobile app that makes it easy for users to connect with awesome local businesses. Founded in 2004, Yelp has taken root in countries across the globe as the leading local guide for real word-of-mouth on everything from boutiques and mechanics to restaurants and dentists. Today, Yelp has 38M+ unique mobile visitors and 92M+ unique desktop visitors every month. Keeping things running smoothly requires the best and brightest in the industry. Our engineers come from diverse technical backgrounds and value open source and creative problem solving. They write tests, review code, and push daily to keep Yelp the richest source of local data out there.

## zeroG GmbH

Data Science & Analytics in the domain of Aviation

Number of employees: 60–65

[www.zerog.aero](http://www.zerog.aero)

Our company name reminds us that digitalization leads to fundamental change, moving from traditional paradigms to unprecedented new realities. A creative mindset and agile way of working is necessary to tap that potential. zeroG (founded in 2015) is a subsidiary of Lufthansa Systems and is dedicated to unlocking the intrinsic power of data to improve the world of aviation.

At zeroG, everyone is encouraged to explore their creativity and personal potential, by taking up different roles and drive great ideas forward. We champion self-initiative over a rigid hierarchy and celebrate ownership over delegating responsibilities. We have a digitally-fit mentality, focused on collaboration and adaptability to meet the challenges and opportunities of an ever-changing world.
